

Easy Solutions - Instruction of Use:

Way One:

1. Type '**csc318a4.herokuapp.com**' in your browser (Sorry about the term 'csc318', it's a typo when we create it)

Way Two:

1. Make sure NodeJS and MongoDB are up to date
2. Use the terminal and 'cd' to the root directory
3. Type '**npm install**' in terminal
4. Type '**npm start**' in terminal
5. Type '**localhost:3000**' in your browser
